## Feature Of BLE2 Series

The mechanism of the motor is renewed, resulting in compact, high power, and highly efficiency motor. The driver employing the digital display panel allows you to easily set the speed with the knob.

- The operating panel enables easy setting
- Torque control is enabled
- Multiple speed operation Up to 16 speed
- Holding torque (50% of the rated torque is held)
- Degree of Protection IP66\*
- A stainless steel shaft is equipped as a standard\*
- The motor and gearhead have already been installed
- Quick and reliable wiring and connection
- Cable with selectable direction

\*The protection rating and the output shaft material depend on the gearhead used. See the Product Line table for details. → Pages 8~9

### The Operating Panel Enables Easy Setting

The operating panel is installed in the front. While checking the digital display, you can set the operation data or parameters with the operation keys or the setting dial.

● The operating panel cannot be detached from the driver.

- Speed Setting Range 80~4000 r/min\*  
\*Depends on the gearhead.
- Speed Regulation ±0.2%\*  
\*Digital setting

### Quick and Reliable Wiring and Connection

The connector enables quick and reliable connection.
